Education

National University of Singapore

Jan 25 –

- Masters of Computing in Artificial Intelligence
- Relevant courses taken: Uncertainty Modeling in AI, AI Planning and Decision Making, Neural Networks and Deep Learning, Graph Machine Learning, Machine Learning Systems

General Assembly

Dec 19 – Mar 20

- Data Science Immersive
- Acquired knowledge on various machine learning algorithms (classification, regression, unsupervised learning, neural networks) and natural language processing (word vectorization, stop words removal, stemming, lemmatization)

National University of Singapore

Aug 13 – May 17

- Bachelor of Engineering (Hons): Industrial and Systems Engineering (Highest Distinction)
- Relevant courses taken: Data Structures & Algorithms, Software Engineering, Probability, Statistics, Simulation, Operations Research, Project Management
- Dean's List: Academic Year 2013/2014 Semester 1, Academic Year 2014/2015 Semester, Academic Year 2016/2017 Semester 1

Final Year Project

Aug 16 – May 17

- Analyzed and evaluated data on transport connectivity, public housing prices and other variables
- Engineered statistical models to assess the impact of transport connectivity and other variables on public housing prices, and proposed changes required for more equitable housing

Work Experience

Halliburton, Data Scientist

Jan 26 – Present

- Implemented a computer vision project using Snowflake to extract tables from PDF documents for data processing
- Developed AI workflows using Microsoft Copilot Studio
- Performed natural language processing to extract information from files using RegEx

Defence Science and Technology Agency, Data Scientist

May 19 – Jan 26

- Analyzed COVID-19 contact tracing cases as part of a joint-ministry effort to identify COVID-19 clusters
- Cleaned, analyzed, modeled data using Python and its associated data science libraries including pandas, numpy, scikit-learn, TensorFlow and Keras
- Applied computer vision techniques to parse formatted tables from PDF documents for LLMs
- Worked on text mining and natural language processing projects including topic modeling and sentiment analysis using Gensim, NLTK, and spaCy
- Deployed full-stack Dockerized microservice analytics applications into production environment

Cambridge CARES Pte Ltd., Software Developer

Jan 18 – May 19

- Successfully completed a full-stack web development project concerning 3D visualization of building models using JavaScript, HTML, CSS, OSMBuildings.js
- Performed unit test and integration testing

Co-curricular Activities

Office of Student Affairs, Student Buddy

- Facilitated welcome activities for incoming exchange students from universities around the world
- Resolved NUS students' concerns about exchange program and other overseas opportunities

Additional Information

- Worked in an Agile/Scrum environment
- Fluent in English and Mandarin (both spoken and written)
- Intermediate Proficiency in German and Basic Proficiency in French
